

RegenePro™ Collagen Wound Care

Regenerative Solutions

RegenePro Sponge

RegenePro Plug

Manufactured by Syntacoll GmbH

Distributed by:

BIOMET 3i™
PROVIDING SOLUTIONS - ONE PATIENT AT A TIME™

100% Purified Type I Bovine Collagen

A proprietary manufacturing technology allows these products to take the shape of the wound where the collagen fibers absorb the liquids and help to accelerate healing.

Conformable & Absorbable

FEATURES:

- 100% purified Type I Bovine Collagen
- Provides a collagen matrix for tissue in-growth to accelerate and assist in healing
- Absorbs fluids from the wound site for wound stabilization
- Highly Resorbable – Fully resorbs in 2-3 weeks

Collagen Wound Dressings:

RegenePro™ Plug

Cylindrical shape is highly adaptable, plugs the extraction site and absorbs fluids. The RegenePro Plug is rapidly and completely absorbed by the body, while the collagen helps promote granulation and tissue growth.

The RegenePro Plug is not intended for use as a bone void filler. When placed in an extraction socket, it is solely for the management of the wound.

RegenePro Sponge

For the management of intraoral wound sores, ulcers (non-infected or viral) and periodontal surgical wounds. With superior handling properties, it also aids in absorption of fluids for stabilization of the wound.

Ordering Information:

RegenePro Plug	10-pack	RPROP10
RegenePro Sponge	10-pack	RPROS10
